RoadStallion

A Whole New Class of Chauffeured Ground Transportation

There is no chauffeured ground transportation in the world for travelers in groups of 4-9 quite like that offered in a Mercedes-Benz RoadStallion. First introduced to business aviation travelers at the 2018 NBAA Regional Show in White Plains, it was at Churchill Downs that RoadStallions really broke from the field of vans, limos and shuttles serving thoroughbred patrons there.

For many racehorse owners, trainers and racing enthusiasts who arrived from all over the world for the Kentucky Derby and the Breeders' Cup World Championships, the ground transportation in and around Louisville and Lexington was incidental. But not for those who were chauffeured in a RoadStallion. Whether they were greeted at the FBOs or at the farms, their transportation on the ground was transformed into a surprisingly unforgettable part of the total Kentucky experience.

During Breeders' Cup week, five RoadStallions were at work chauffeuring racing patrons between the FBOs, the downtown hotels, Churchill Downs, and the parties before and after the races. RoadStallions really shone chauffeuring owners and clients between the incomparable Lexington horse farms and the track, as well as to the invitation-only, Taste of the World event hosted by the Breeders' Cup at the Speed Art Museum.

RoadStallions routinely are stabled with well-known limousine companies in an

A RoadStallion meeting you and your group at the FBO makes the ride on the ground as memorable as the ride in the sky. The elegance and capacity of a RoadStallion is comparable to that of many private aircraft; that's why clients say a RoadStallion is a "private jet on wheels." When an SUV cramps your space, and a van cramps your style, there is nothing in the world like a RoadStallion.

Ask your air charter broker or preferred ground transportation provider to book a RoadStallion for you and your group for service in So. CA or anywhere east of the Mississippi by calling or texting 800-684-4724 or emailing info@roadstallion.com. RoadStallions can be booked through them, or with RoadStallion, Inc. directly. ■

RoadStallion does not operate any chauffeured ground transportation. All vehicles owned by RoadStallion are leased to US DOT registered and state licensed motor carriers and are insured and operated exclusively by those carriers in accordance with all applicable state and federal inspection, insurance and operating regulations.

At the 2018 Derby, RoadStallion earned the ultimate compliment when clients who had chartered one of the RoadStallions for race day asked the chauffeur "Can you just drive us around for a few hours? We had so much fun being chauffeured to the races in the RoadStallion that rather than go to dinner, we'd rather just ride around, sip our drinks and enjoy each other's company." For another party going to dinner before flying out at Atlantic Aviation, the traffic delays getting away from the racetrack did not interfere with the experience because they were so enjoying their time together in the RoadStallion.

expanding number of major metropolitan areas of the US (NYC, LA, Miami, Palm Beach and Atlanta for example) and are available there to chauffeur clients traveling in small groups for entertainment or business. And for those extra-special sports, music and cultural events, RoadStallions and their chauffeurs are there - wherever they take place. They have been chartered by discerning patrons of independent means for the Super Bowl, The Masters, PGA tournaments, GR 1 thoroughbred races, equestrian and polo events, awards ceremonies, and the Final Four.
